SUMMARY

Frontend developer focused on building clean, usable web apps. Comfortable across the full MERN stack — from designing React UIs to wiring up REST APIs and MongoDB.

PROJECTS

Ai task platform

Tech stack React/Next.js, Node.js, Express, Python, MongoDB, Redis, Docker, Kubernetes, CI/CD, ArgoCD

- Built a scalable AI task processing platform that allows users to submit heavy AI operations without affecting frontend responsiveness.
- Developed the frontend using React/Next.js and built REST APIs with Node.js and Express for authentication, task handling, and communication between services.
- Create a Python-based Worker Service that consumes tasks from a Redis queue and processes them asynchronously in the background.
- Integrated MongoDB for persistent task storage and Redis for high-speed queue management and real-time task execution.
- Containerized backend, frontend, and worker services using Docker to ensure consistent development and deployment environments.
- Deployed the complete microservice architecture on Kubernetes and used Argo CD for automated GitOps-based deployments and infrastructure synchronization.
- Implemented a CI/CD pipeline using GitHub Actions to automate Docker image builds, testing, deployment workflows, and infrastructure updates.

AI Resume Builder

Tech Stack: React.js, Node.js, Express.js, MongoDB, OpenAI API, Tailwind CSS

- Developed a full-stack AI-powered resume builder that generates professional, role-specific resumes using OpenAI GPT API based on user inputs.
- Built a dynamic multi-step form in React with real-time preview, allowing users to customize sections like Experience, Skills, Education, and Projects.
- Implemented PDF export functionality enabling users to download a clean, formatted resume directly from the browser.
- Designed a responsive and modern UI using Tailwind CSS with smooth transitions and an intuitive editing experience.
- Handled backend with Node.js and Express.js with RESTful API endpoints for user data management and AI prompt processing.

Finance Dashboard — Interactive Financial Tracking UI

Tech Stack: React.js, Tailwind CSS, Recharts, Context API + useReducer, Framer Motion

- Built a fully responsive finance dashboard with real-time summary cards (Total Balance, Income, Expenses) and interactive charts using Recharts for balance trends and spending breakdowns.
- Implemented a clean role-based UI system (Admin/Viewer) where Admin can add, edit, and delete transactions while Viewer has read-only access — all simulated on the frontend with zero backend dependency.
- Designed a Transactions section with live search, multi-filter (type, category), and sort functionality with a graceful empty state when no results match.
- Engineered global state management using Context API and useReducer with a single reducer handling all actions (add, edit, delete, filter, role switch) for predictable state flow.
- Added optional enhancements including dark mode, localStorage persistence, CSV export, and Framer Motion page transitions as thoughtful UX improvements.

Professional Portfolio Website

Tech Stack: React.js, Next.js, Tailwind CSS, JavaScript

- Developed a modern, responsive portfolio website showcasing projects, skills, and professional experience.
- Implemented smooth animations, interactive UI components, and optimized user experience across all devices.
- Deployed on Vercel with continuous integration for seamless updates and high performance.
- Utilized Tailwind CSS for modern styling and maintained clean, maintainable code architecture.

SKILLS

- **Languages:** JavaScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Responsive Web Development
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, SQL
- **Tools & Technologies:** Git, GitHub, Postman, npm, VS Code, Vercel

EDUCATION

- **B.Tech, Computer Science Engineering 2021 – 2025**
 - Maharishi Dayanand University, Rohtak
- **Senior Secondary Education (12th) 2019 – 2020**
 - Haryana Board of Education
- **Secondary Education (10th) 2017 – 2018**
 - Haryana Board of Education

CERTIFICATIONS

Infosys Springboard Program:

- HTML5 – The Language
- CSS3
- JavaScript
- ExpressJS Essential Training
- Learning MongoDB

Other Certifications:

- Data Entry Operator Training - Sambhav Foundation (Reliance Foundation Initiative)

LANGUAGES

- **English:** Fluent (Written & Spoken)
- **Hindi:** Native Fluency (Written & Spoken)
